

# Mukunda Gujjar

Results-driven technology leader specializing in web development, enterprise monitoring, and automation.

m@mukundagujjar.com • <https://www.linkedin.com/in/mukunda-gujjar> • Tokyo, Japan

## Education

### University of Mumbai

July 2018 - Aug 2022

Bachelor of Engineering, Information Technology  
8.41 CGPA

## Experience

### Consultant I Dynatrace

Oct 2024 - July 2026

- Managed a **USD 1.5 million monitoring and automation project for State Bank of India**, successfully ensuring on-time delivery and seamless rollout.
- Spearheaded strategic solution design and implementation strategies for major financial clients including Axis Securities, Kotak Securities and BNP Paribas.
- Developed and deployed dashboards, and automation workflows on Dynatrace, while also managing out-of-the-box and custom integrations with 3rd party applications built by Oracle, RedHat, MongoDB, ServiceNow, and Riverbed.
- Built apps on top of Dynatrace AppEngine utilizing the proprietary Strato Design component library (Next.js/Typescript).
- Designed and implemented high-impact automation modules using Python and Shell scripts, significantly improving real-time data ingestion efficiency and reducing manual operational workload for major financial clients.
- Led the development of complex data integration solutions, connecting internal systems with platforms for financial regulatory bodies (SEBI) and exchanges (NSE).
- Led cross-functional development teams to deliver custom web and automation solutions for financial institutions.

### Senior Analyst I Capgemini

Aug 2022 - July 2024

- Led the full-stack development of internal analytics platforms using Next.js, built on the Dynatrace AppEngine to monitor and visualize real-time user metrics.
- Handled complete infrastructure and application monitoring using Dynatrace and ScienceLogic.
- Created custom Dynatrace extensions in Python for monitoring network and infrastructure devices.
- Deployed automation scripts in Python and shell on production RHEL servers, reducing manual workload by 11 hours per week.
- Served as the primary Single Point of Contact (SPOC), bridging engineering execution with senior leadership (VP-level reporting) to ensure project alignment and clear communication of progress and risks.
- Directed end-to-end Agile project lifecycle (sprint management, milestone tracking) for internal analytics platform development, ensuring alignment with executive goals.

## Leadership & Activities

### Dynatrace

- Leading development teams for projects at India's largest bank (State Bank of India), Axis Securities & BNP Paribas.
- Liaising directly with Deputy General Managers, Directors and CXOs to design and deliver custom full-stack solutions.

### Capgemini

- Acted as the team's SPOC, managing communications with senior leadership and driving project strategy.
